---

## WORK EXPERIENCE

Front-End Developer | ThemePerch, Dhaka, Bangladesh

January 2024 - July 2024

- Developed responsive websites using Next.js and Tailwind CSS as a front-end developer.
- Created user-friendly and interactive interfaces for web applications.
- Gained hands-on experience in React.js, Next.js, Tailwind CSS, and Framer Motion for building modern UI/UX.
- Learned and applied industry best practices for front-end development in a professional environment.
- Successfully completed my first job as a web developer, enhancing my skills and understanding of web development.

---

## PROJECTS

Duralux-Dashboard | [Link](#)

- Built a React.js-based dashboard using Bootstrap and SCSS with various functionalities, including event scheduling, filtering, and management with categorized views (e.g., daily, weekly, monthly).
- Interactive charts for data insights using libraries like ApexCharts. Features to manage users, including adding, editing, and deleting user data.
- Provides theme switching between light and dark modes for enhanced user experience.

DevLink | [Link](#)

DevLink is a responsive link-sharing website developed using HTML, CSS, and JavaScript.

- Create, read, update, delete links, and see previews in the mobile mockup.
- Drag and drop links to reorder them. Save data in localstorage
- Add profile details like profile picture, first name, last name, and email.
- Preview their devlinks profile and copy the link to their clipboard. and many more.

Architronix | [Link](#)

Developed a modern, responsive website using Next.js, Tailwind CSS, and Framer Motion for an architectural design firm.

- Responsive layouts and custom styling ensure cross-browser compatibility.
- Implemented user-friendly navigation, clean design, and optimized performance for seamless user experience.
- Designed a fully responsive layout to provide a consistent user experience across devices.
